Apr 2012-Aug 2014

Front End Developer

Isiran Software Company

Isiran Software Company is one of the biggest software companies in Iran. The major activities are analyzing and designing and implementing desktop and web application; managing and monitoring integrating software in country level and educating IT and language programming.

My responsibilities:

- Involved in creating a web based official automation.
- Maintained existing websites and made required changes in the HTML, CSS and JavaScript codes
- Developed and maintained the front end functionality of websites.
- Participated in discussions with clients to clarify what they want.
- Creating logos, banners and buttons for websites using Adobe Photoshop.
- Simultaneously managed several databases and reporting tools
- Provided technical support to end users.
- Developed a minor car sale web site with PHP at university as a project.
- Made several minor web pages using bootstrap framework

- Designed and developed websites using HTML, CSS, , jQuery and Photoshop
